# IG Report

# General

Report is superficial and filled with inaccuracies and innuendos.

Don't know where the information was obtained, but SIPS contributions and capabilities are blown up out of proportion to reality.

### Plans and Review

Recommendation #13. Consolidate Plans, Review, and SIPS System Personnel into Planning and Systems Staff attached to D/Pers office.

- 1. No reasons given to put in D/Pers office.
- 2. Separation gives Plans opportunity for oplanning. Not true under old Plans and Review Staff.
- 3. Real test for organization alignment is D/Pers reaction, not what is usual on an organization sheet.
- 4. Short two-bit studies not necessarily conducive to solving important problems.
  - 5. Have been oversold on SIPS.

#### Control Division

Recommendation #14. [nitiate action to insure continuous control and location of all OPF's. Include scheduled physical inventory of files to verify location and control of records.

- 1. We are exploring it but are not sure courier receipts are the answer. It still takes discipline.
  - 2. Files are not lost for months at a time.
  - 3. QAB codes Clandestine Service people.

# Approved For Release 2001/05/01 : CIA-RDP82-00357R000300010023-7

- 4. OP did the bulk of the report review, not SIPS.
- 5. Can't train SRB personnel on Data Management Center until we learn more about SIPS too.

## PMCD

Agree - we have requested more cailing; we plan to insert new blood at the higher as well as lower levels. We are scheduling more surveys, and hope to finish DDP in two years.
